HOUSEKEEPING
FOR ERP & BW

DataVard ERNA

HOUSEKEEPING FOR ERP & BW

Every SAP® system transaction creates temporary data on technical and application levels which quickly lose purpose and value. In order to assure performance and system size this data should be deleted as soon as possible. Housekeeping of this temporary data is typically complex and involves significant effort. SAP® customers often have as much as 40-50% of their database polluted with temporary data. DataVard ERNA automizes and navigates management of your temporary data by moving it to a temporary storage for future accessibility or deletion, clearing out junk data and implementing measures which ultimately improve performance.

REDUCED SYSTEM SIZE

Systems populated with only current (temporary) data result in less storage need and effort in complex activities such as system copies or upgrades (particularly with SAP HANA®).

INCREDIBLY FAST

Systems with less dead weight result in exceptional performance and faster data upload.

AT A GLANCE OVERVIEW

Housekeeping is navigated and automized by a central cockpit while optimizing performance and providing expert tips.

It's that easy!

DATAVARD ERNA ORGANIZES AND AUTOMIZES YOUR HOUSEKEEPING!

DataVard ERNA is designed to orchestrate your resources efficiently. All DataVard ERNA tasks are easily automatized in setup. Data is predetermined to be deleted or temporarily placed into a storage efficient recycle bin. This data remains accessible as needed. DataVard ERNA supports both your SAP®

ERP-System and SAP® BW-System. 41 different objects are currently supported, e.g. Application Log (BALDAT), Batch Log, IDOCs, Alert Management Data (SALRT*), Spool (TST03), Process Chain Logs, Change & Transportsystem, request logs & tables and RFC-Logs.

"Most enterprises find it easy to set up new data however housekeeping, deletion and storage of old data is often neglected. This practice results in an ever increasing challenge and ultimately at the end of data lifecycle becomes a risk for the entire enterprise."

Pierre Audoin Consultants (PAC)

Who we are
