**BW & HANA**

PROVIDES YOU WITH:

### FULL ACCESS

ALL DATA REMAINS  
AVAILABLE

### PERFORMANCE

ACCELERATED DATA  
LOAD, ACCESS TO HOT  
& WARM DATA

### WORLD-CLASS

UP TO 95% DATA  
COMPRESSION

## DataVard OutBoard™

### MANAGE YOUR DATA IN LINE WITH IST VALUE

Current trends, the likes of Big Data and in-memory computing have resulted in many enterprises comprehensively investing in their BI landscape. The challenge: massive data growth is already a primary cause for increasing operating costs, poor performance in upload and data analysis as well as runtime for upgrades, system copies, recoveries and backups. New applications result in additional exponential growth making it difficult to differentiate worthless from valued data.

**The solution:** clever data management! DataVard OutBoard™ provides you with a Nearline Storage and Data Management solution for SAP® BW and HANA.

### CONTROL DATA GROWTH

DataVard OutBoard™ keeps data growth at bay without sacrificing complete access to data.

### STRAIGHT FORWARD

Our experienced consultants are on hand to ensure a smooth and fast implementation.

### EXCEPTIONAL VALUE

We are proud of the fact that OutBoard™ generates tangible value that exceeds the investment by far (ROI 6-18 months).

## FEATURES

100%  
ABAP

- ★ NO ADDITIONAL HARDWARE OR DATABASE
- ★ ALL DATA REMAINS AVAILABLE
- ★ TAKES ON ALL DATA: INFOCUBES, DSOS, PSAS, CHANGELOGS
- ★ ADD-ON FOR TEMPORARY DATA (E.G. APPLICATION LOG )
- ★ ONE SYSTEM, ONE PRICE FOR ALL DATA AND USERS
- ★ RAPID MASS ARCHIVING
- ★ SIMPLE INTEGRATION INTO PROCESS CHAINS

## It's that easy!

### DATA ANALYSIS, DATA CLASSIFICATION , DATA COMPRESSION

DataVard OutBoard™ enables a clean separation of data by operational relevance through user friendly tools for data analysis. Day-to-day business data stays in your online database, while old and cold data is stored at up to 95% compression with DataVard OutBoard™. This data remains accessible for reporting and analysis tools. Direct and indirect costs are lowered by decreasing

system size and controlling database growth. Additional advantages are enhanced systems' performance, simplified systems' administration and expediting complex tasks such as upgrades, system copies, recoveries and backups.
